

# WONJINTECH

Knitted Wire Mesh Professional Manufacturer

## Greetings

**Professional** Knitted Wire Mesh manufacturer,

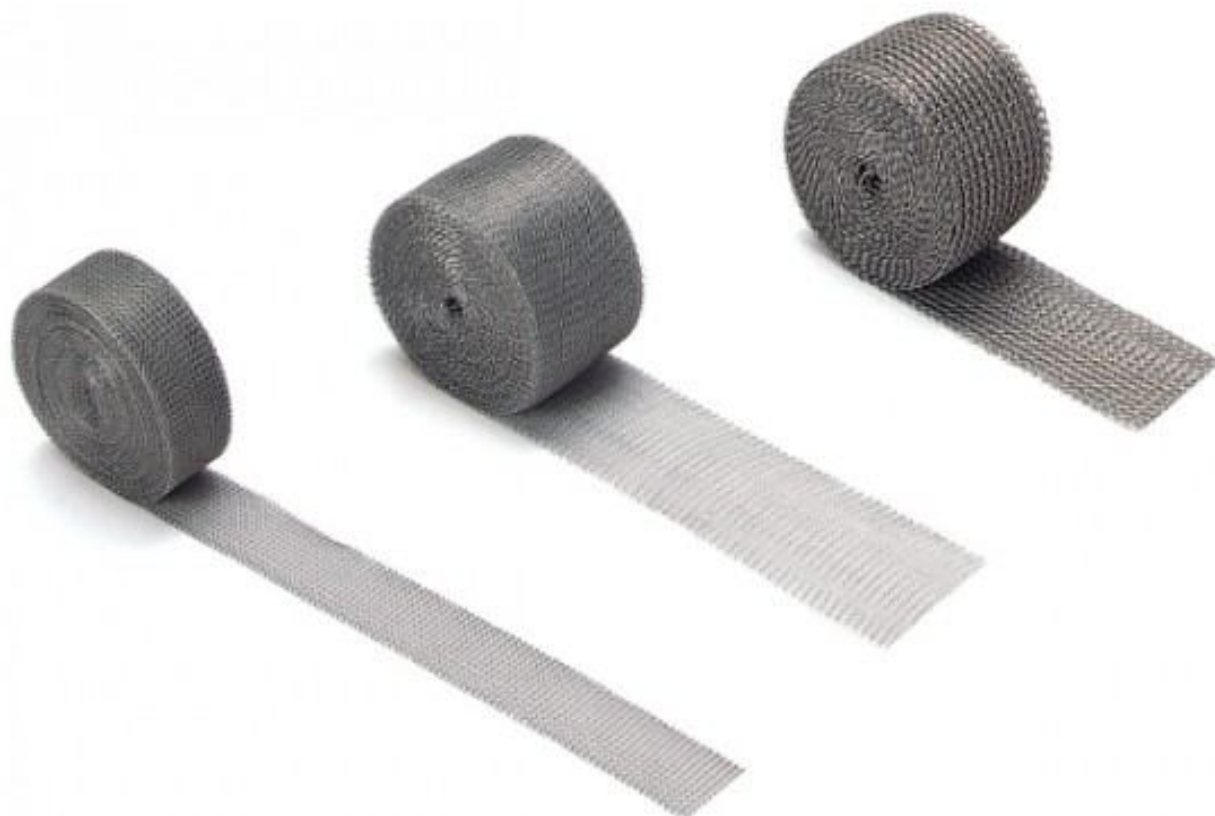

**Wonjintech** is supplying only quality product based on best technological power. We are a competitive, differentiated company and our executives and staff members are working together, united based on true comradeship and spirit of loving customers. In order to go ahead always in an ever changing era of unlimited competition, we would like to return to customers' diverse demand through customer satisfaction and future-oriented management. We will appreciate your support with continued encouragement interest.

## History

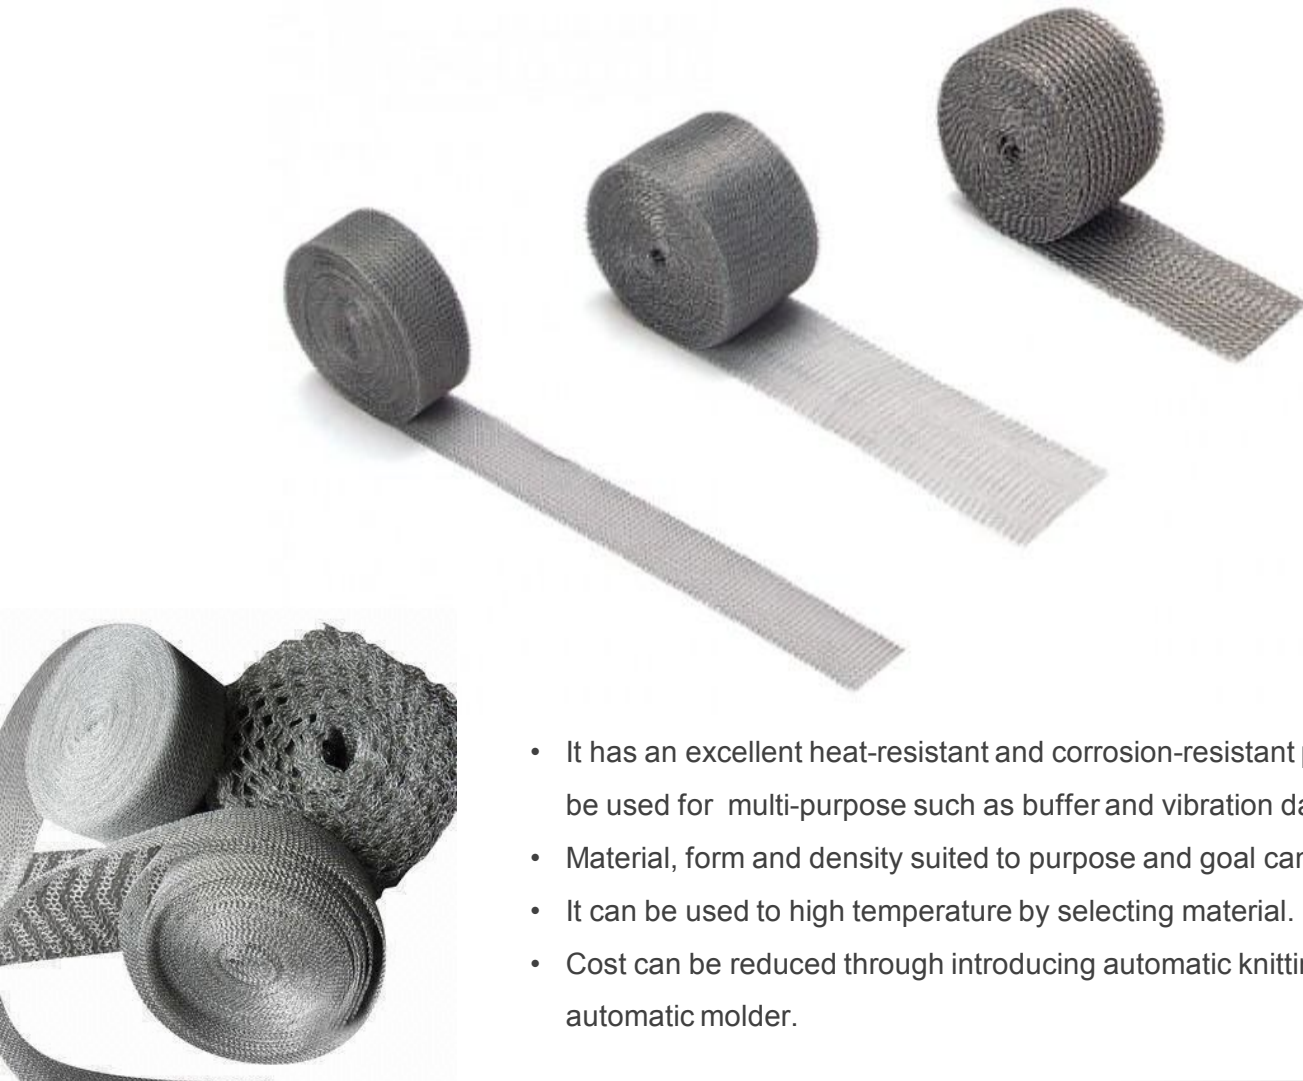

**2015**

\*Wonjintech Established

\*ISO 9001 Quality Certificate Obtained

## Knitted wire mesh Rolls

- It has an excellent heat-resistant and corrosion-resistant property, so it can be used for multi-purpose such as buffer and vibration damper material.
- Material, form and density suited to purpose and goal can be selected.
- It can be used to high temperature by selecting material.
- Cost can be reduced through introducing automatic knitting machine, automatic molder.

### Mesh Type

- Stainless Wire SUS-304,304L, 316,316L.
- Zinc Plating Wire
- Nickel Wire
- Brass Wire
- Aluminum Wire
- Titanium Wire
- Inconel Wire

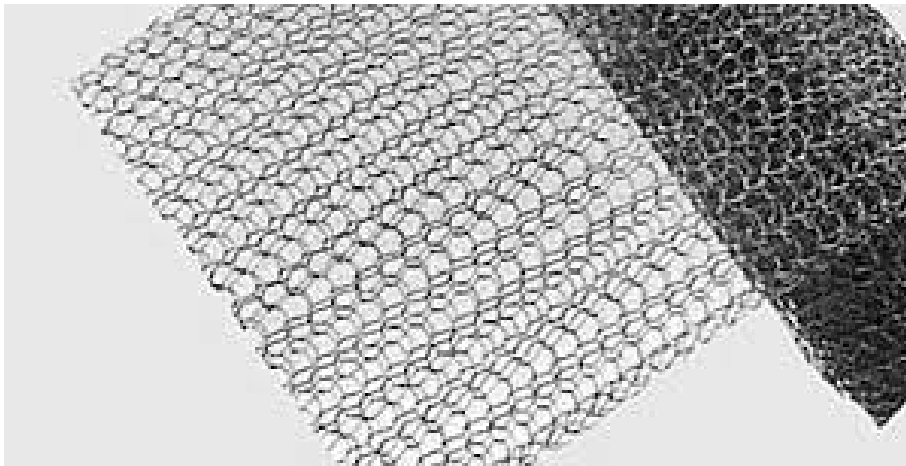

## Exhaust System joint parts

**Uses** It prevents noxious gasses leakage due to vibration by absorbing shock, vibration and strain of the car exhaust part. And it absorbs noise and shock of absorption and exhaust part.

- For the purpose of protecting car convertor's catalyst, Support & Cushion
- For the purpose of preventing combustion of car muffler's glass wool
- For the purpose of absorbing vibration of car muffler, Ring & Seal Ring

## Knitted wire mesh EMI / RFI Shielding

Wire mesh designed for [EMI / RFI Shielding](#) is very effective in electromagnetic wave shield and it can be applied to any product because of its diverse forms.

Knitted wire mesh is very suitable item for the effect of electromagnetic wave shield in the panel part or door side and it is a product for shielding electromagnetic wave very effectively, which we use by attaching or clamping to necessary part in suitable form. All wire meshes in the form of mesh are tangled together like loops, so it has very reducing effect when electromagnetic wave passes through mesh

## Knitted wire mesh Gaskets & Seals

**Knitted wire mesh** is used in various forms in the all fields of industry and plays a role of gaskets & seals.

It has endurance against temperature, vibration and corrosion and it is being used in the field of oil refining, oil chemistry, gas chemistry and all kinds of synthetic chemistry. And also it is being used as all kinds of wash towers, absorptive tower and dust removing air filter medium for pollution prevention and safety health.

In addition, a lot of utilization is being explored in wide range of industries
