AEGIS

iPhone X / 8 / 8 Plus

BEYOND U.S MILITARY STANDARD WITHOUT THE BULK

LEVEL AEGIS Case is the most protective case from Patchworks, yet it is not bulky. Easily exceeding U.S Military Standard MIL-STD-810G standard which require to survive after 26 consecutive free fall drops from 4ft (1.2M) height at various angles. Aegis assures extreme protection with high quality dual-layered protection. In addition, corners are protected by extra layer of PORON XRD Extreme Impact protection cushion, makes this case triply protected in such a low profile. Side of the case has bump finish to ensure more grip. Front is raised high so even with your tempered glass screen protector on, the case edge is still higher than the surface of the tempered glass screen protector. All these at the same time, Enjoy this Zero bulk LEVEL Aegis case. DROP IT! NO PROBLEM!

DROP TESTED PROTECTION

LEVEL AEGIS case meets or exceeds U.S Military standard drop testing requirements. It means it is protective enough to protect your iPhone safely from 26 consecutive free fall drops from 4ft (1.2m) height at various angles. LEVEL AEGIS case is a dual layer case made of premium polycarbonate and TPU that provides better impact absorption while keeping simple and slimmer design than other boxy cases in the market. Interior is structured to disperse as much as impact energy as possible to achieve minimum impact energy per area.

DUAL LAYER TRIPLE MATERIAL PROTECTION

Mighty strong German Polycarbonate and Thermal Polyurethane.
With additional Poron XRD at Corners.

WHAT IS PORON XRD?

XRD® Material gets its softness when at rest while above the “glass transition temperature” (Tg) of the urethane molecules. When stressed at a high rate or impacted quickly, the Tg of the material reaches the point when the urethane momentarily “freezes” - like water freezing into ice. When this happens, the material firms to form a comfortable protective shell that shields the body from impact better than other protective foams currently available. On the measure that matters most – absorbing more impact energy at higher speeds

AIR POCKET INTERIOR FOR IMPACT ENERGY DISPERSION

All the sides and back of the interior is designed with air chamber system to ensure it absorb as much impact energy as it can.

AIR POCKET INTERIOR

High raised front lip

Front bezel is raised 1.8mm to ensure to protect your screen even with the thick tempered glass screen protector is on. Front lip will be still higher even with your tempered glass screen protector on.

SIDE BUMP FOR BETTER GRIP

Side of the case has bump finish to help you get more grip.

LARGE PORT HOLE

Large cutouts of charging port hole allowing to work with most 3rd party cables.

TACTILE BUTTONS

Tactile buttons to ensure clicky responsive feedback.

MAGNETIC CAR MOUNT READY

Space for Metal plate is built-in the case
for your convenience.
