ENEROID

SMART BATTERY CHARGER & STORAGE

Eneroid works for you recharging batteries over again automatically

Together with ENEROID you recharge not only rechargeable Batteries, Its recuperates normal single use batteries including alkaline ones making them reusable more than twice time. Eneroid's smart sensing sorts good or bad and automatically recharge successively batteries dropping to the main compartment, smartly, non renewable failed ones are drop to separated compartment.

AUTOMATIC RECHARGING SYSTEM

Standby Battery Compartment

Just pile up and let the Eneroid manage the polarity for automatic recharge for you

Fail Battery Compartment

Charging fail and end life batteries are dropped separately in this place

Ready to use Battery Compartment

Successfully recharged and renewed batteries are dropped in this place

Any Polarity Direction

Regardless of the direction of the battery terminal, ENEROID is able to recognize the terminals and charge up the batteries automatically.

Battery Storage

After recharging batteries, ENEROID stores normal and defective batteries separately inside it.

LED indicator

LED indicates the condition of ENEROID. If the upper part of the LED indicator turns on, you need to check the charging part. If the lower part of the LED indicator turns on, you need to check the storage part.

C-type power supply

ENEROID is equipped with the USB C-type power supply so its stability and durability are excellent. Also, ENEROID is compatible with the 5V 2A cable.

**NEW
ARRIVAL**

Eneroid with Wireless Charging pad

ENEROID

The wireless charging pad is built into the Eneroid cover, allowing wireless charging such as mobile devices. It can be used with or without charging the battery using Eneroid.
