About Us

Company Overview

※ **Company Name**

ACHIM Co., Ltd.

※ **Date of Establishment**

August 20th, 2015

※ **Production and Sales items**

HACCP certified manufacturing plant /
Specialize in the production of HMR
convenience food made from
agricultural, livestock, and seafood products.

01

About Us

Company Introduction

We have invested heavily in product research and development for 4 years.

As a result, we have an individual sterilization method that is different from the existing technology.

HACCP certified factory produces individual sterilization products for agricultural, livestock and marine products. It is a future growth company with excellent growth potential that takes less than six months to enter convenience stores and supermarkets.

It is a domestic manufacturing innovation company that is not only gaining rapid growth in the domestic food market by applying the best quality food development technology, but also showing great interest in 60 overseas markets such as Southeast Asia, Europe and the United States.

We are ACHIM Co., Ltd., a fast growing, innovative company that is leading the rapid expansion of the HMR market.

제4장 결론

→ 설정한 품질지표 중 결정계수가 가장 높은 관능평가의 0-자판율식으로 35℃에서 15.09개월과 유통기한이 산출되었다. 하지만 유통 과정에서 외부적 요인을 고려하여 실제 유통기한은 단축될 수 있으므로 실험기간(15.09개월) × 안전계수(0.8) = 12.07개월로 추정하지만 실험기간에 따른 최대 유통기한은 12개월 이내로 하는 것이 바람직하다.
(단, 본제품은 25℃이하로 유지 관리되어야 한다.)

(Achim Salmon Steak) Report on the Results of the Expiration Date Experiment

Chapter 4. Conclusion

→ The expiration date of 15.09 months was calculated at 35°C as the zero-order response of sensory evaluation with the highest determination coefficient among the quality indicators set. However, the actual shelf life is shortened when taking into consideration the external factors in the distribution process. The shelf life period can be estimated to be the experimental period (15.09 months) X the safety factor (0.8) which equals 12.07 months. The maximum shelf life of the test period is therefore preferably within 12 months.

(This product should be maintained at a temperature below 35°C.)

Thank you
